

EXPERIENCE

Senior Software Development Engineer (SDE 2), Sellergize WTS

Mar 2024 – Present

Mumbai, India

- Spearheaded development of a performance testing suite, improving backend processing efficiency by 30% and reducing test runtimes by 50%.
- Engineered a white-label Flutter mobile app for affiliate marketers, driving a 20% increase in user engagement.
- Built and deployed a cross-browser extension with real-time offer tracking and targeted ad displays, boosting conversions by 15% across 12 platforms.
- Coordinated CI/CD pipeline enhancements, Scalable Deployment flows using AWS and cross-team debugging efforts, cutting incident response time by 40%.
- Architected and designed the Zifup project end-to-end using low- and high-level system design in MySQL, ensuring scalable database performance.

Software Development Engineer 1 (SDE 1), Sellergize WTS

Jul 2022 – Mar 2024

Mumbai, India

- Developed and maintained 10000+ client Flutter-based mobile applications with a shared codebase, reducing development duplication.
- Revamped WordPress themes, plugins, and browser extensions; implemented automated deployment pipelines to cut release time by 30% and reduced deployment-related errors from five per week to zero per week.
- Optimized backend APIs using caching and load balancing techniques to reliably support over 50,000 daily users.
- Enhanced ClipMyDeals platform with scalable RESTful APIs and improved error handling, reducing common integration issues by 25%.
- Led incident resolution for production issues, reducing average bug turnaround time by 25% through rapid API fixes and code reviews.

PROJECTS

Zifup.com – Digital Coupons Aggregator

- Integrated AI-powered workflows to verify coupon authenticity, improving data quality by 65%.
- Architected and deployed scalable scraping pipelines for 150,000+ stores using Go, PHP, JavaScript, Python, and Bash, including automated monitoring and maintenance.
- Engineered a Python-based web crawler generator that indexed 50,000+ product pages daily, leveraging a headless browser and rotating proxies to bypass bot detection and improve scraping efficiency.

ClipMyDeals.com – WordPress Ecosystem for Affiliates

- Created a modular WordPress coupon theme for 20,000+ affiliates, driving adoption and simplifying future feature rollouts.
- Developed a plugin suite (comparison, cashback, alerts) adopted by over 10,000 affiliates and shipped companion mobile apps and browser extensions.
- Enhanced UX by redesigning coupon layouts and adding multiple new features, leading to a 15% increase in session duration.

CouponAPI & LinkMyDeals

- Overhauled WordPress themes, plugins & browser extensions and automated CI/CD pipelines, cutting release cycles by 30%.
- Scaled Go-based APIs to handle millions of coupon requests daily across global partners.
- Hardened API endpoints by configuring CORS policies and patching vulnerabilities, ensuring secure, compliant consumption.

Supp – Real-time Chat Application

- Delivered a full-stack real-time chat application using WebSockets (Socket.IO), React, Node.js, and MongoDB with zero downtime.

SKILLS

Backend	Go, PHP, Node.js, Laravel, Express.js, Python, Bash
Frontend	Flutter, React, Vue.js, Tailwind CSS, Bootstrap, JavaScript
Databases	MySQL, MongoDB
DevOps & Tools	Git, CI/CD, Docker, AWS, REST APIs, Chrome Extensions
Others	WordPress Plugin Development, Affiliate Marketing Tech, AI Automation (ChatGPT)

EDUCATION

MCA, IDOL, University of Mumbai

2023 — 2025

B.Sc. IT, CHM College, University of Mumbai

2019 — 2022

CGPA: 9.9 / 10.0

Senior Secondary (XII), Kendriya Vidyalaya, Ambernath

2018 — 2019

Percentage: 77%

Secondary (X), Kendriya Vidyalaya, Ambernath

2016 — 2017

Percentage: 88%
